Circulation and Respiration

Series Title: Human Body Series

Curriculum Area: Science

Distributor: Visual Learning Company

Length: 20:00 min.

Instructional Design: acceptable

Curricular Match: very good

Technical Quality: very good

Balance: very good

Interest: acceptable

Comparability: very good

Content: very good

Grade Level: Secondary

Release Date: 2003

The viewers will learn about the functions of the circulatory and respiratory systems in the body. The video

is rich in vocabulary which is shown on the screen. Examples are given to reinforce the numerous vocabulary

words. I would highly recommend this video for higher level middle school science classes and high school

biology classes. What is impressive is the amount of time spent on reinforcing the different parts of the

circulatory and respiratory systems.
