Oceanography

Series Title: Planet Earth

Curriculum Area: Science

Distributor: Visual Learning Company

Length: 20:00 min.

Instructional Design: exemplary

Curricular Match: acceptable

Technical Quality: exemplary

Balance: acceptable

Interest: exemplary

Comparability: very good

Content: very good

Grade Level: Secondary

Release Date: 2002

One of the best productions I've seen on the subject of oceanography! A well-organized

production with clear, concise, and well-documented definitions, supported by excellent

photography. Would be a good title to introduce the subject, or to be used as a review,

or both. Video quiz a good addition to the video--viewers have to pay attention to be able

to answer the questions.
